2nd

interview

sharing lifelines

Setup

**Share
lifelines**

1st

interview

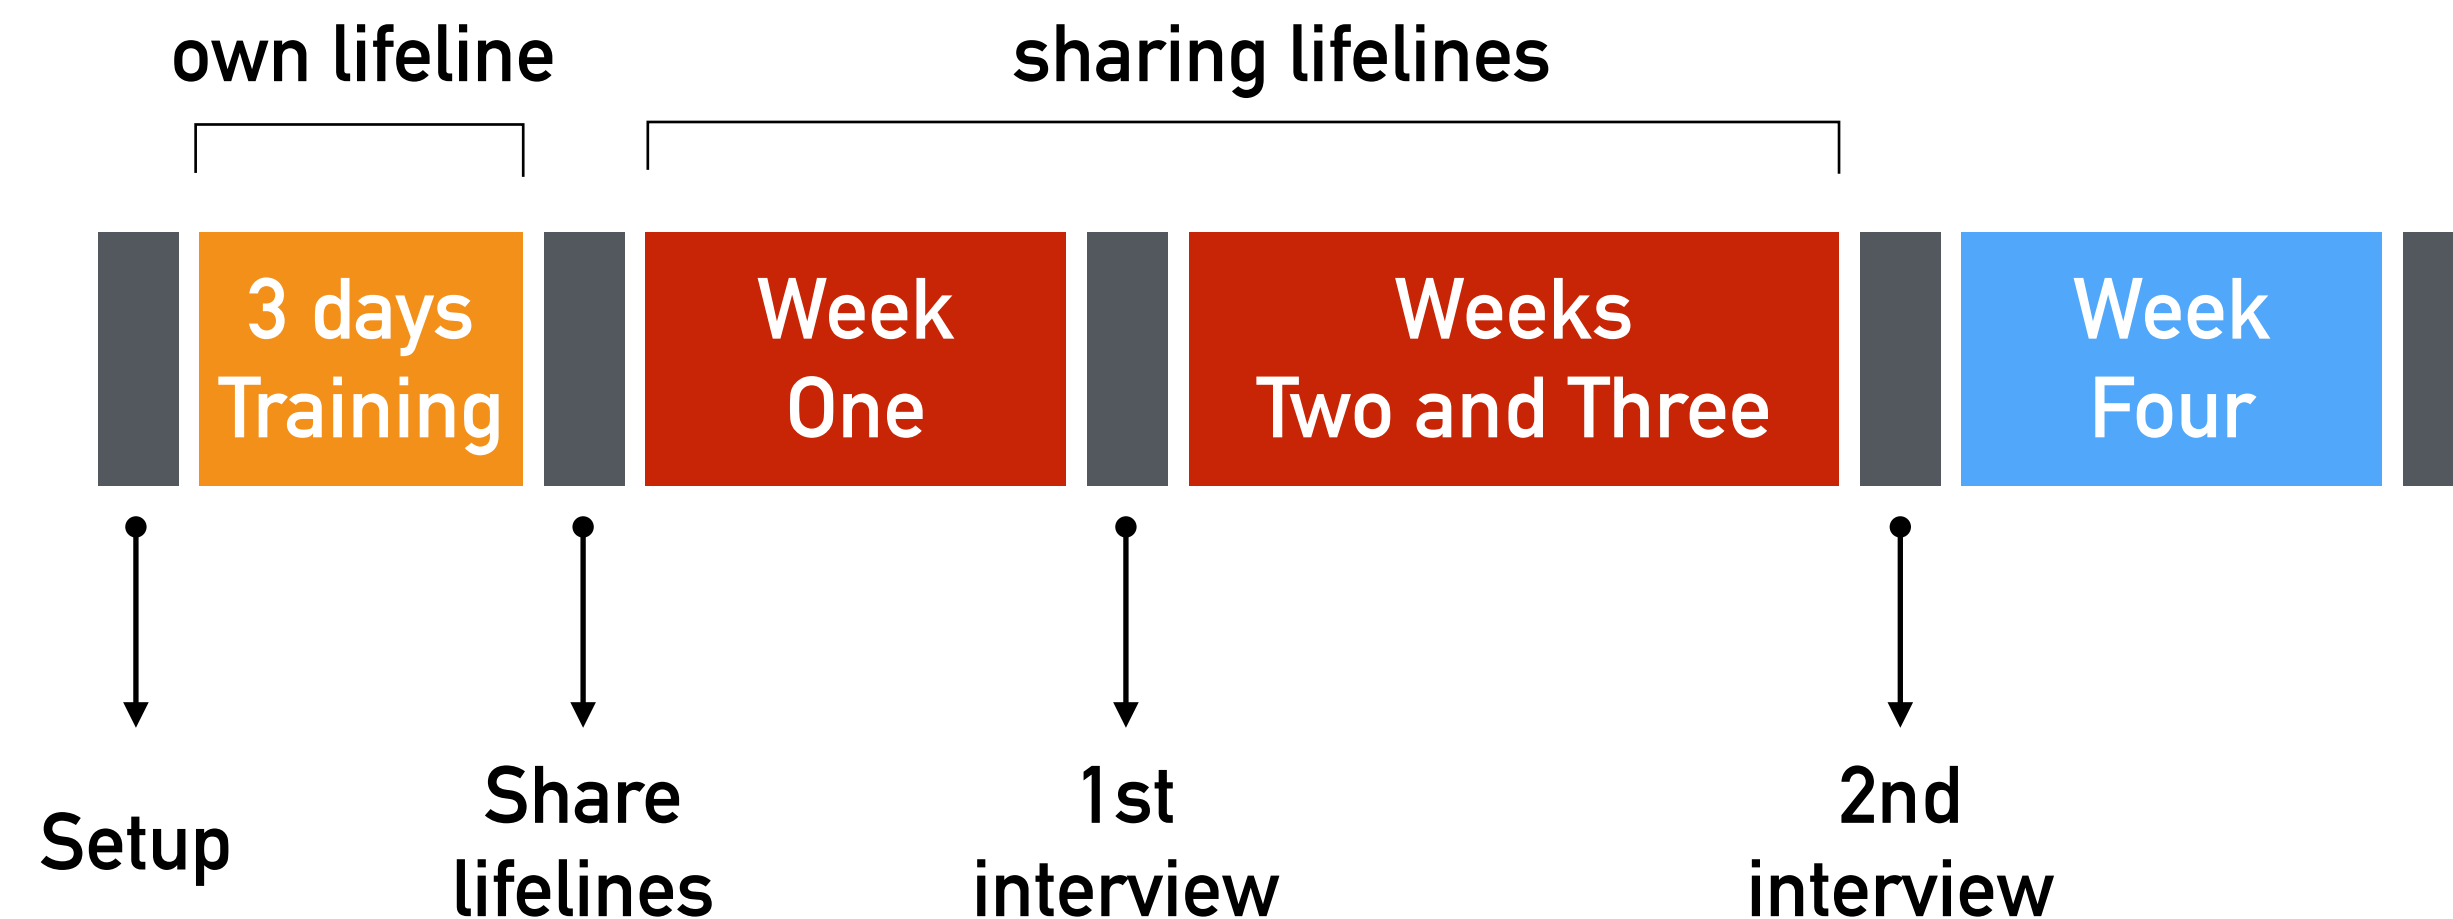

own lifeline

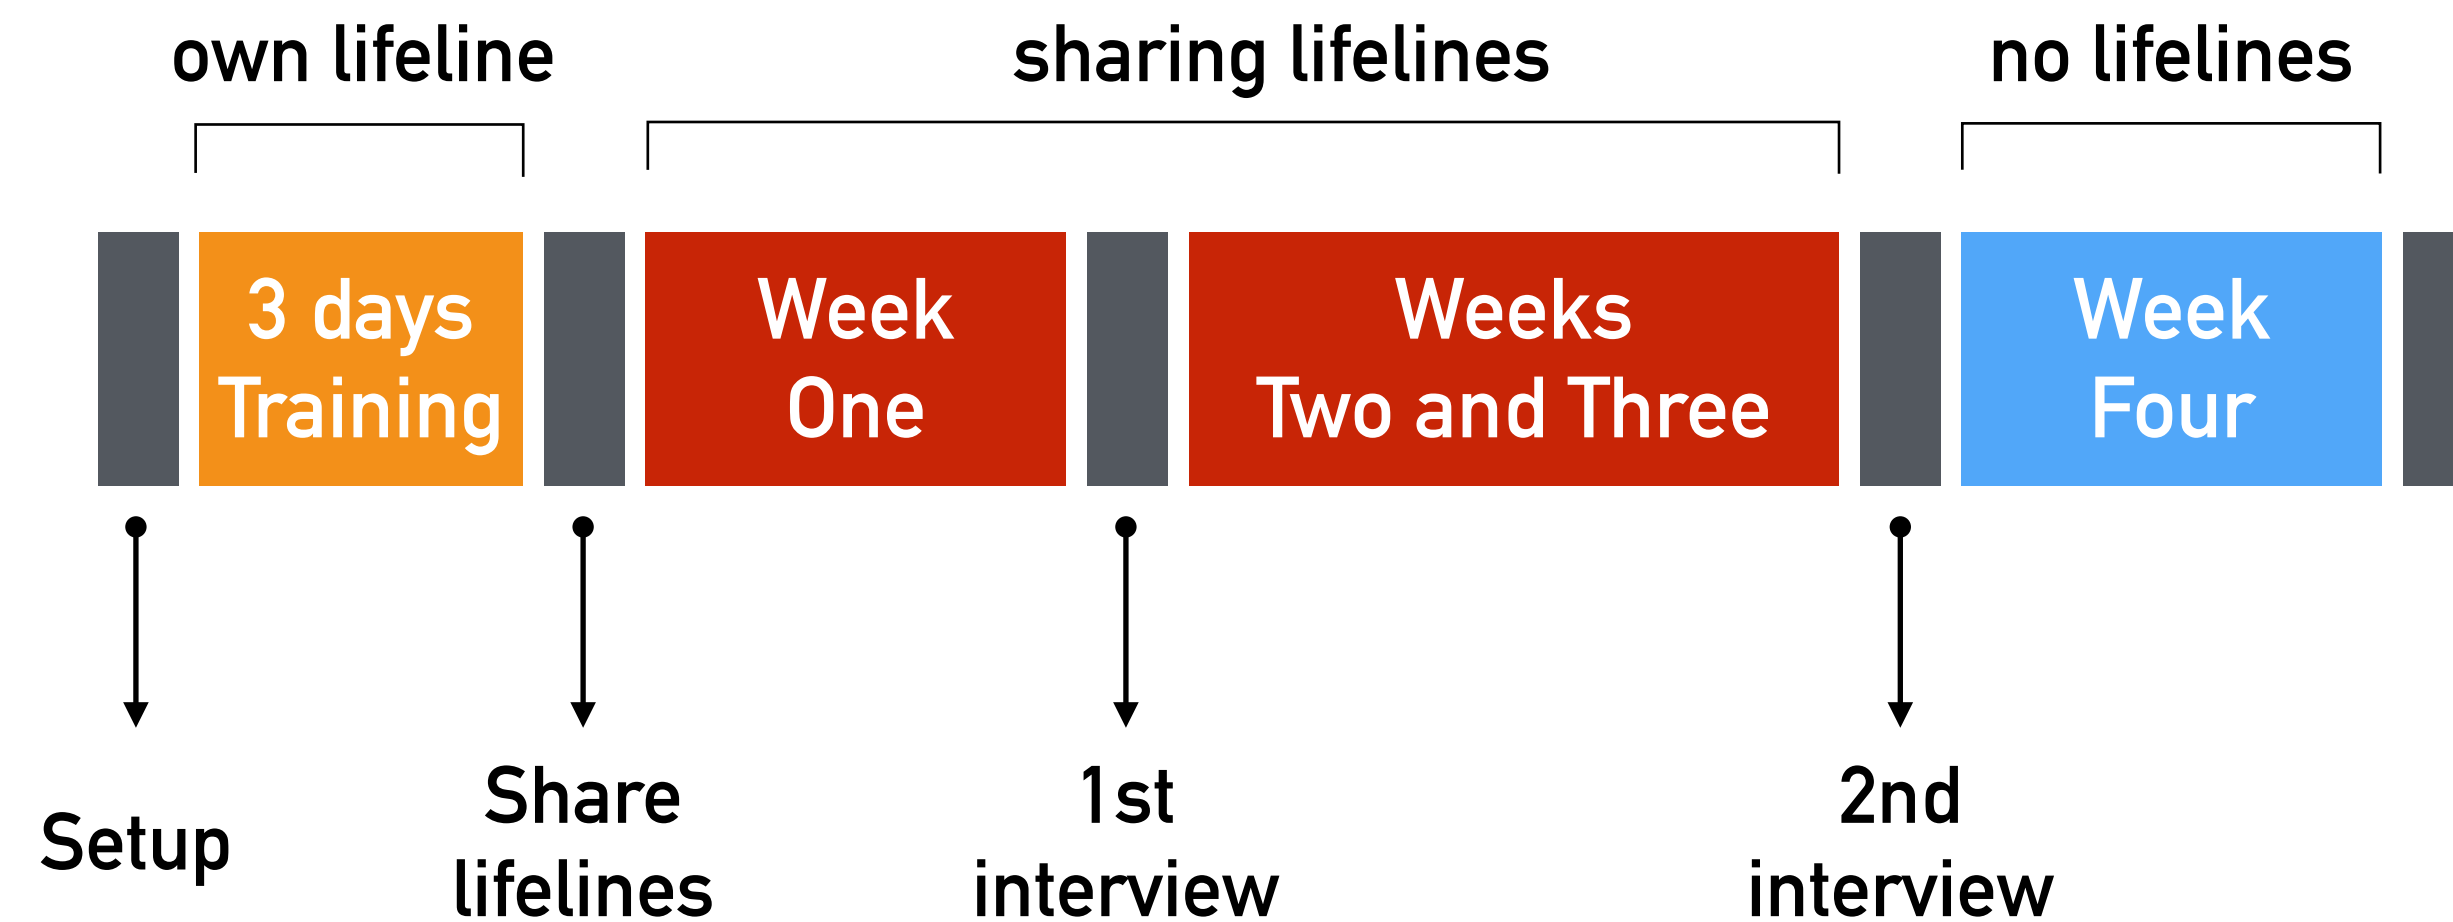

We have a 1st interview after 1 week of sharing the contextual data so we can capture participant's first impressions, taking advantage of novelty effects

Then we wait 2 more weeks for the 2nd interview, to learn about their experiences past the novelty effects

We have a 1st interview after 1 week of sharing the contextual data so we can capture participant's first impressions, taking advantage of novelty effects

Then we wait 2 more weeks for the 2nd interview, to learn about their experiences past the novelty effects

Last, we ask them to STOP sharing their lifelines and come back to them after a week, so we learn about the contrast of sharing vs. not sharing contextual information
