Heurística #4: Consistencia y estándares

Consistency and standards

- Consistencia interna: mantener consistencia en el vocabulario, paleta de colores, mapeo entre íconos y acciones y entre feedback e input en todo el sistema

The screenshot displays a Moodle course interface, illustrating consistency in design. The browser address bar shows the URL `moodle.aau.dk/course/view.php?id=48286`. The course page features a sidebar on the left with a consistent layout of links: "Semester: SW3 KBH", "Lecturer: Jeanette Falk Olese...", "Information on the course", "Purpose, content and evalua..." (highlighted), "Literature", "News forum", "Study Secretary: Christina M...", and "Repository of Usability Fails". The main content area has a top navigation bar with tabs: "Course" (selected), "Settings", "Participants", "Grades", "Reports", and "More". Below this, there is a list of course sections, each with a consistent icon and text: "Purpose, content and evaluation - E23", "Page Literature", "Forum News forum", and "Database Repository of Usability Fails". The interface uses a clean, modern design with a consistent color palette and iconography, demonstrating internal consistency.
